Nathaniel Charles Web Developer

810.623.1494 • nathaniel@nscharles.com • nscharles.com

Objectives

- Create responsive, user-friendly, maintainable websites.
- Use my experience to bridge back-end development and front-end design.

Experience

2011 - Present **Web Developer** at **The Wesleyan Church** - Fishers, IN

- Developed front-end and back-end projects for the organization and its various sites.
- Implemented software development best-practices, including version control, SOLID design principles, and standardized VMs for local development.
  - Identified the need for development standards.
  - Researched available solutions.
  - Presented findings to the team and gained support and approval.
- Developed a system that automatically syncs product information from a Microsoft Dynamics GP inventory system to an online e-commerce storefront.

2009 - 2012 **Freelance** as **nscharles Illustration & Design**

- Provided graphic design, UI design, logo design, illustration, and web development.
- Served as UI designer on an iPhone/iPad app for a financial company.

2007 - 2009 **Graphic Designer** at **Digital Chicken** - Ann Arbor, MI

- Took projects from design to completion, prepared projects for printing, and edited video.
- Worked directly with clients and walk-in customers.

Education

2010 **BS Illustration**, Indiana Wesleyan University

- Emphasis on Digital Illustration and Graphic Design
